

BEACON'S CUSTOM VMI SOLUTIONS

Beacon's VMI Support Program is a strategic management solution that provides inventory balance without sacrificing product availability. As an extension of your procurement team we maintain six to eight months of inventory in our supply chain ensuring your parts will be in stock and available when you need them.

KEY BENEFITS OF OUR VMI MANAGEMENT PROGRAM:

INVENTORY MANAGEMENT AND INVESTMENT

Reduce your on-hand inventory levels and lower your overall investments including storage and handling costs.

PRODUCT HANDLING AND INSPECTION

Save time and money by eliminating duplicate inspections and improving your procurement process. We will minimize your costs associated with receiving and product inspection with our comprehensive quality validation process.

PRICE STABILITY

Minimize volatility and provide steady profitability with a long-term pricing agreement.

INVENTORY ALLOCATION

Mitigate the risk of shortages and stockouts caused by extended production lead times.

PERFORMANCE REVIEWS

Recurring meetings to review and discuss performance against program goals and current objectives.

A DEDICATED SALES REP

We are committed to building a strong partnership with you by supporting your account and meeting your specific business goals.

A QUALITY DRIVEN COMPANY FORMING THE FUTURE
